

The champion in its weight class.

The lighter they come, the more sustainable they are: The JST reduces the amount of material used, produces lower CO₂ emissions when transported and decreases disposal fees. At the same time the JST is more stable and robust than other ultra-light buckets. Its slender handle enables medium filling weights to be transported reliably, ergonomically and conveniently.

The Jokey Seal Tainer as a square bucket.

The JSTQ offers a lot of room for your product and its message. It makes ideal use of the space on the pallet and on the shelf. Its square side walls offer a perfect even area for your brand message.

Containers at a glance

Square	ISO-Vol.	Upper Ø	Height
JSTQ 50	5.85 l	199 mm	211 mm
Round	ISO-Vol.	Upper Ø	Height
JST 35 NEW	3 l	226 mm	126 mm
JST 44 NEW	4.5 l	226 mm	163.6 mm
JST 50	6.1 l	226 mm	212.6 mm
JST 55 NEW	6.3 l	245.5 mm	183.6 mm
JST 107	11.7 l	269 mm	288 mm

The ultra-light containers with the peel-film edge.

Kitchen professional with freshness seal.

The new Jokey Seal Tainer is tailored precisely to the needs of your bulk consumers. The ultra-light container has a widened edge to which a peel-off sealing film can be attached. The film protects your product and ensures trust on the part of the user.

Quick, reliable – and so easy.

Where sealing films previously had to be cut open with a knife, the Jokey Seal Tainer now offers welcome user convenience - the peel film can be quickly and easily opened and pulled off without any tool. There is no danger of injury, and the kitchen staff saves valuable time.

Sustainable subsequent use.

The film can be removed completely, leaving no residue on the edge. Once the JSL's contents have been used, the container can be employed as a practical storage bucket.

Decoration options

The bucket can be printed and enhanced using all decoration processes: from the convenient offset method to brilliant In-Mould Labelling – through to sensory effects and watermarks for digital interaction with mobile terminals.

Ultra-lightweight

As a bucket of the category UL, the JST consumes fewer resources and generates lower CO₂ emissions when transported, and also reduces disposal fees.

Broad edge for peel films

The broad container edge permits it to be sealed using peel film.

Freshness seal with convenience factor

The film protects your product and ensures trust on the part of the user. It is quick and simple to peel off completely without using a tool.

Stable and robust

Thanks to its innovative design, the Jokey Seal Tainer is more robust and reliable to transport than comparable light containers.

Feather-light handle

Thin and yet extremely strong - the tried and tested Jokey patent handle has a high vertical and horizontal load-bearing capacity. It can be coloured separately using the two-component process.
