Product catalogue
The whole world of Jokey
The Jokey standard programme.
Practical, reliable and communicative.

All manufacturers and industries worldwide appreciate jokey plastic packaging for food and non-food products. With forward-looking, market-driven innovations, we continue to set standards for the packaging industry. Our broad product portfolio is the result of decades of close cooperation with our customers.

Your packaging partner worldwide.
Competent, personal service is important to us. We are happy to advise you—from the selection of packaging and user-oriented accessories to effective branding. We also support you in the set-up of your filling line. With 15 production sites in 12 countries, we deliver your packaging worldwide in consistently high quality and just in time.
Jokey has stood for outstanding expertise in plastic injection moulding since 1968. As a family-owned company, based in Wipperfürth, Germany, we are one of the world’s largest manufacturers, innovators and technology leaders in the field of rigid plastic packaging—and have been a pioneer in sustainable packaging for more than 30 years.

The Jokey Group
Jokey SE

A global, customer-driven, family-owned company.

The Jokey Group facts & figures.

15 PLANTS IN 12 COUNTRIES
2,000 EMPLOYEES FROM 43 NATIONS
8,000 CUSTOMERS IN 86 COUNTRIES
496 MILLION EURO TURNOVER
615 INJECTION MOULDING MACHINES
40–1,800 TONS CLOSING FORCE
501 IN-MOULD-LABELING ROBOTS
1990 FIRST BUCKET MADE OF 100% RECYCLATE
Accomplished plastic expertise.
Our business divisions

Packaging solutions
The right packaging for every purpose.

Jokey Individual
Packaging individually designed and decorated for you.

Jokey Technics
Technical plastic parts of uncompromising quality.

Jokey SPA
Our brand variety for your bathroom idea.

Set an example as a family.
The Jokey values

Our good market position is due to a sustainable business strategy—shaped by values that the owner family represents both internally and externally. They are the cornerstones of our decisions. Today and in future.

Down-to-earth attitude
Jokey is a traditional and modern global player and regionally committed. We reinvest our profits. Our high equity ratio gives us stability in volatile markets—and agility when it comes to innovation, quality, service and sustainability.

Quality and competence
Every day and everywhere, we strive for quality and competence. It begins with simple things as thoroughness and order and extends to the continuous development of the professional and personal competence of every employee, every manager and every shareholder.

Respectful honesty
We communicate openly, honestly and transparently. We regard feedback as an incentive to improve. By respectful honesty, we open up new creative possibilities for our employees; and we are a trustworthy partner to our customers, partners and stakeholders.

Ecological and social responsibility
As a family business, we take our responsibility towards people and nature very seriously: as a safe and crisis-proof employer, as a guarantor for a sustainable business policy, and as a pioneer for sustainable packaging, and a participant in shaping the ecological balance.
How can we guarantee the safe and efficient supply of almost eight billion people and, at the same time, deal responsibly with energy, resources and the environment? Plastic packaging will make an elementary contribution if society changes its way of thinking: with a sharper awareness of the importance, but also the potential of recycling and with a differentiated, fact-based assessment of the sustainability of packaging.

Packaging functions with sustainability factor:
- Protects products from transport damage and loss
- Extends the shelf life
- Ensures taste and aroma
- Hygienically and physiologically safe
- Easy handling, better portioning and dosage
- Reduces space and energy requirements for storage and transport
- Offers orientation and creates brand

Many advantages, low weight:
- Light
- Shockproof and durable
- Versatile, shapeable, flexible
- High density
- Resistant to chemicals and temperature
- Technically efficient and resilient
- 100 % recyclable with low energy consumption

Our goal:
The circular economy.

The longer we actively use plastics in the value-added cycles the more sustainable they become. This requires a globally structured and conscious approach to waste and recycling. As one of the largest manufacturers, we take a special responsibility in this regard. To meet this responsibility, we have developed a guideline on which we measure our packaging and ourselves: the Jokey Eco Concept.

Did you know?
40 % of the harvest in developing countries is lost due to lack of packaging.

The packaging consumption in tonnes would be 53 % higher if other packaging materials replaced plastics where possible.

As early as 1990, Jokey brought the first bucket made of 100 % recycled material onto the market—and helped to develop the dual system in Germany.

[jdv brochure "365 days always at your service" 2019; study GVM "What would be without plastic packaging" 2002]
We at Jokey are convinced that the ideal packaging is both maximally functional and maximally sustainable. By developing the Jokey Eco Concept, we have created a guideline for combining both. Our goal: maximum product functionality with minimum ecological footprint. We are working towards this goal with ten fields of action in the areas of Eco Strategy, Eco Resources and Eco Design.
**Eco Strategy**  
**The strategic base.**

If you want to make a difference, it is best to start with yourself. The first three fields of action of the Jokey Eco Concept underline our comprehensive approach and provide the basis for all others.

---

**Eco Company**
As a family business, we think long-term. Our future strategy is based on three pillars: solid growth, ecological action and social responsibility. We are convinced that entrepreneurial success requires a careful attitude towards people and nature. Our vision is to become climate neutral by 2050.

**360° Responsibility**
Our responsibility does not end when a Jokey packaging is dispatched from the factory. We are actively working to ensure that it is also returned to the recycling cycle—not only here, but also in all 82 countries of our customers. To achieve this, we are in constant and open dialogue with customers, partners, associations and NGOs.

**CO₂-Balance**
As a pioneer in the field of sustainability, our goal is climate-neutral packaging. Until Jokey is fully CO₂-neutral, we offer our customers CO₂ compensation with certificates in sustainable climate projects. Here we work together with a network of NGOs and other stakeholders.

---

**Eco Resources**
**Sustainable materials.**

For 30 years, we have been consistently developing our products at many levels of sustainability. The use of sustainable materials, especially recycled materials, is a key factor in this respect.

**Virgin plastic**
**Food Contact**
Paints, construction materials, chemicals and other non-food products packed just as well and safely in our 100% recycled packaging as in new plastics. High functionality thus meets an ecologically valuable contribution to resource protection—with all finishing options from colour to in-mould labelling.

**Secondary raw materials**
**Circular raw materials**
Since 2010, we have been working on the replacement of carbon-based polymers with raw materials from biomass. However, not everything that is renewable is of ecological advantage—which is why we at Jokey only use raw materials that have internationally recognised certificates of origin and composition.

**Renewable raw materials**
Jokey packaging for food contact is produced under the high hygiene regulations of the GFSI standard. In addition, only raw materials are used that meet the legal requirements and are 100% recyclable. In this way, it provides the recyclate cycle with high quality, physiologically harmless mono-material.

---

**Sustainable materials.**

The use of sustainable materials, especially recycled materials, is a key factor in this respect. For 30 years, we have been consistently developing our products at many levels of sustainability.

In addition, only raw materials are used that meet the legal requirements and are 100% recyclable. In this way, it provides the recyclate cycle with high quality, physiologically harmless mono-material.
Eco Design
The sustainable form.

The design of Jokey packaging plays an important role in reducing its ecological footprint. For many years, we have been optimising it with regard to its sustainability—in production, use and recycling.

Resource efficiency
Packing as much product as possible with as little material as possible—this maxim has driven our research and development since the early 1990s. With success: we have now reduced the operating weight of our packaging by up to 40% by means of increasingly efficient and at the same time functional designs.

High-grade technical recyclability
Only homogeneous packaging materials achieve optimal recycling results. Therefore, we only use plastics and decorations that are 100% recyclable. Jokey packaging is thus completely recyclable and can be reused as recycled material without any technical quality losses.

Full drainability
All Jokey packaging allows complete access to the contents by removing the lid. This guarantees consumer protection and simplifies the recycling process, because residual fillings lead to a high level of additional technical effort and cost an unnecessary amount of energy.

Second use & Reuse
Jokey packaging is robust, completely emptiable and reliably reclosable. It retains its function after its life as packaging and can be used for a wide variety of purposes. At the same time, it remains 100% recyclable at all times. Moreover, it helps your brand to attract constant attention.

jokey.com/en/the-jokey-eco-concept
Visit jokey.com for more information on the “Eco Concept.” You can also contact us personally—we look forward to hearing from you!
Your shape. Your colour. Your design.

JOKEY INDIVIDUAL
A unique packaging designed just for your product attracts attention and encourages consumers to buy it. It conveys the emotional world, the promise of quality and the value of your brand. A strong packaging design gives your product all the attention it needs on the shop shelf and makes you stand ahead of competition.

Jokey Individual
Sensationally different.

Jokey will decorate or manufacture your packaging exactly according to your ideas and exactly in the corporate design of your brand. You benefit from the excellent expertise of our packaging experts and the latest state of the art in packaging technology in terms of design, functionality and convenience. As decoration methods, brilliant in-mould labelling, high-quality digital printing and offset printing are available.

Unique packaging design.

Only the interplay between logo, colour, text and image creates the unmistakable corporate design of your brand. It gives your product the brand identity and highlights its position in a competitive market. Put your message in the limelight!

Images appeal to the gut feeling and stimulate the buying impulse. Jokey offers you a variety of finishing options: from offset and digital printing to Jokey's unique in-mould labelling. This process allows for emotionally appealing motifs of fascinating brilliance: the complete container surface and the lid can be printed entirely right up to the edge. Optional multisensory effects entice you to smell, touch and marvel.

Container colours
Unmistakable your brand.

Colours arouse emotions and are one of the most important recognition features of your brand. We manufacture your packaging in any colour of your choice—including transparent, of course. Buckets and handles can be coloured differently. In addition to the 11 Jokey standard colours, we optionally offer many special colours and individual colouring according to PANTONE, RAL or HKS. Flitter and metallic effects as well as luminescent packaging materials provide glamour.

Custom-Moulding
Individual types of packaging.

Nothing differentiates more than an individually designed packaging. Would you like an eye-catcher that attracts all attention at the POS? Or would you like to tailor the function of your packaging specifically to your customers? The Jokey Moulding Service develops a special design in close co-operation with you, which corresponds exactly to your wishes. Jokey Werkzeugbau GmbH guarantees precise moulds and Jokey Technical Service supports you in setting up your filling line.

Sustainable material selection
Packing responsibly.

Sustainable packaging is increasingly important to consumers. In addition to 100 % recyclable new plastics, we therefore also offer plastics made from strictly controlled renewable raw materials; in the non-food sector, you can also use PCR or special recyclates to set yourself apart from your competitors.

Future technologies
Connected and convenient.

- Packaging 4.0 communicating with mobile devices or scanner cash registers.
- Intelligent packaging, such as thermochromics’ effects that indicate temperature changes by changing colour.
- Smart packaging with additional barrier function, such as the Jokey-Barrier-Tainer, as well as our extensive range of accessories.
More conscious packaging.

Sensitivity about sustainable packaging is increasing—among both consumers and retailers. Manufacturers assuming an attitude have the option of using various recyclates—they are in no way inferior to new plastics and offer many attractive design options.

Our recyclates

Combined sustainable

Completely printable

Sustainability with a basic colour.

Whether message with sustainability or sustainability with message: from the classic silver-grey post-consumer recyclates (PCR) from the collection of recyclable materials to different coloured post-industrial recyclates (PIR) to special recyclates such as Ocean Based Recycled Plastic (OBRP); within certain colour limits, many sustainable messages are available here. We would be delighted to advise you!

It's the combination.

If you do not have the option of deviating from the colours of your corporate design, you can provide the recycled packaging with a lid or handle made of new plastic in your company’s corporate colour. As with the container colours made of new plastic, we also offer the option of PANTONE, RAL or HKS colouring in addition to many standard colours. In this way, your packaging will always remain unmistakably your brand and increases its recycle content nevertheless.

Colourful with a sustainable core.

Jokey’s in-mould labelling process (IML) allows a packaging made of coloured recycled material to be printed right to the rim as if it were made of white new plastic—including the lid. The printed label is placed in the injection mould and thermally bonded to the packaging during the injection process. In addition to the IML process, digital printing and other finishing techniques as well as colouring of the plastic are also possible.
Full service for your packaging design.

We have created the Jokey Design Service to ensure that you can use the full sales potential of your packaging. As a full-service provider for packaging design, we support you from consulting on design to the creation and production of artwork.

The Jokey Design Service creates your packaging design for any of our standard or custom moulded packaging. We will design a packaging for you that meets the taste of your target group, promotes your product authentically and emotionally and is unmistakably recognisable as your product brand.

Creation
From consulting to design.

First we discuss what you expect from the packaging design and which elements should be included. Then we develop a design concept. As experienced packaging experts, we know what is technically possible and how to achieve the optimal advertising effect. We recommend a container colour and develop a print image with image motifs, text, logos etc.

Visualization
Turnable 3-D view of your packaging design.

We present our design concept to you as a rendering, as a rotatable digital visualization, as a real prototype or as a small series for presentations and field tests. This allows you to see the design realistically and examine it from all sides. After coordination with you and your approval, we create a final layout of your print image.

PrePress
Technically perfect artwork.

Our printing specialists create the artwork for the print motifs of your packaging. As a leading manufacturer, we combine the experience from creating many thousands of print motifs.

Printing
Finishing at the latest state of the art.

Jokey’s brilliant in-mould labelling process offers emotional motifs in high-definition quality. Even multisensory effects and digital interactions can be integrated into the in-mould labels. For small print runs, we use digital printing to produce labels of similar high quality. Classic offset printing also offers attractive design options.
Our comprehensive range of accessories offers your customers convenient assistance, protects your product, makes portioning and removal easier. We will be happy to help you select the right accessories solution.

**Accessories**

Added value for you and your customers.

Our comprehensive range of accessories offers your customers convenient assistance, protects your product, makes portioning and removal easier. We will be happy to help you select the right accessories solution.

- Drain tap for removing liquids
- Spout
- Quick-Pack Lid, a hinged lid for large buckets
- Wet wipe dispensers
- Plastic roller grips for metal handles
- Hold-down device for products delivered in brine or oil
- Product pump for insertion into pre-punched opening of the lid
- Pump stopper
- Pump embossing
- Shaker lid for mixing paints and plasters
- Rolling top: paint roller screens and paint roller plates are available for rectangular containers
- Recessed lid to store a stirrer bar
- Special UN-approved containers for hazardous goods
- Degassing valve (e.g. for sauerkraut)
- Sealing lid for hermetic sealing
- 2-component insert
Nothing differentiates more than an extraordinary packaging design. When developing such a custom mould, we accompany you in a proven and structured process from the initial packaging idea to the setup on your filling line. As an international technology leader, we have the equipment and capacity to bring the most demanding custom mould projects to market maturity. Our numerous custom mould projects are listed in our programme as Jokey Solution Packaging (JSP).

Your advantages:

- Individual packaging buckets and tubs with lids
- Volumes from 100 ml to 35 l and larger
- Every geometric shape is possible
- Moulds of highest precision and durability
- We support you from planning to the completion of the project

Give your brand
a characteristic shape.

With expert expertise and state-of-the-art technology, we develop your individual packaging design—with our JSP Jokey Solution Packaging series—and develop it from the idea to marketability.

Jokey offers you an outstandingly broad selection of round buckets. Like all Jokey packaging, it meets the highest requirements of automatic hot or cold filling. It optimises your production and logistics processes, protects your product and extends its shelf life. It convinces the consumer with its high level of convenience.

At a glance:
- Numerous volumes in various weight categories for all filling materials
- Numerous accessory options
- One lid diameter for various container volumes
- Available in all colours and using all decoration processes
- Sealing and closure options
- Handle made of plastic or metal
- Optional barrier against oxygen and water vapour

Simple shape. High-tech functionality.
JET Jokey-Euro-Tainer

- The epitome of the multifunctional packaging bucket
- Numerous volumes
- Various weight categories
- Numerous accessory options
- JET PC for special weight efficiency

JST Jokey-Seal-Tainer

**The champion in its weight class.**
The lighter they come; the more sustainable they are: the JST reduces the amount of material used, produces lower CO₂ emissions when transported and decreases disposal fees. At the same time, the JST is more stable and robust than other ultralight buckets. Its slender handle enables the transport of standard filling weights in a reliable, ergonomic and comfortable way.

**Kitchen professional with freshness seal.**
The new Jokey Seal Tainer is tailored precisely to the needs of your bulk consumers. The ultralight container has a widened rim to which a peel-off sealing film can be attached. The film protects your product and ensures trust on the part of the consumer.

Everyday millions of oval Jokey buckets perform excellently as packaging for paints, adhesives and other construction chemical products. We offer you the largest oval series available on the market with volumes from 1.3 to 19 litres. Numerous accessory options increase convenience for craftsmen and do-it-yourselfers.

At a glance:
- Tried and tested bucket for the construction chemicals industry
- Large selection of volumes
- Broad advertising space, all decoration processes
- Numerous accessory options
- Handle made of plastic or metal
- Suitable for shakers

Professionals in paint.
**JETO Jokey-Euro-Tainer-Oval**

The options are not available for all models. Secondary raw materials are only suitable for non-food products. Please take note of our detailed article specifications and technical guidelines.
The new oval JETO+ and its round counterpart JET+ are perfectly suited for the requirements of the construction chemicals industry. Heavy goods such as paints, coatings or plasters are safely packed in it. The robust, compact design withstands even heavy mechanical loads.

100 % leak-proof in the shaker.
Thanks to their innovative lid rim system, the JETO+ containers remain reliably leak-proof even in a shaker. The guarantee for shaker use is 3 x 3 minutes. A perfect paint mixture delights the consumer: the underside of the lid is without segments, ensuring that no paint residues are left there during the shaking process.

Professionals for paints and construction.

The options are not available for all models. Secondary raw materials are only suitable for non-food products. Please take note of our detailed article specifications and technical guidelines.
NEW
JMP 185
ISO 17.85 l
L x W 400 x 292 mm
≥ 260 mm

A completely new packaging shape.
The Jokey Multi-Pack surprises with a successful mix of oval and rectangular design.
The innovative design with rounded corners. Its rounded corners uniquely signalise style and trend awareness.

The best ambassador for your brand.
The new shape combined with an emotional branding makes your product an eye-catcher guaranteed:

The new Jokey Multi-Pack is the ideal packaging for a product launch!
