

### The champion in its weight class.

The lighter they come, the more sustainable they are: The JST reduces the amount of material used, produces lower CO<sub>2</sub> emissions when transported and decreases disposal fees. At the same time the JST is more stable and robust than other ultra-light buckets. Its slender handle enables medium filling weights to be transported reliably, ergonomically and conveniently.

### The Jokey Seal Tainer as a square bucket.

The JSTQ offers a lot of room for your product and its message. It makes ideal use of the space on the pallet and on the shelf. Its square side walls offer a perfect even area for your brand message.

### Containers at a glance

Square	ISO-Vol.	Upper Ø	Height
JSTQ 50	5.85 l	199 mm	211 mm
Round	ISO-Vol.	Upper Ø	Height
JST 35 <b>NEW</b>	3 l	226 mm	126 mm
JST 44 <b>NEW</b>	4.5 l	226 mm	163.6 mm
JST 50	6.1 l	226 mm	212.6 mm
JST 55 <b>NEW</b>	6.3 l	245.5 mm	183.6 mm
JST 107	11.7 l	269 mm	288 mm

# The ultra-light containers with the peel-film edge.

## **Kitchen professional with freshness seal.**

The new Jokey Seal Tainer is tailored precisely to the needs of your bulk consumers. The ultra-light container has a widened edge to which a peel-off sealing film can be attached. The film protects your product and ensures trust on the part of the user.

## **Quick, reliable – and so easy.**

Where sealing films previously had to be cut open with a knife, the Jokey Seal Tainer now offers welcome user convenience - the peel film can be quickly and easily opened and pulled off without any tool. There is no danger of injury, and the kitchen staff saves valuable time.

## **Sustainable subsequent use.**

The film can be removed completely, leaving no residue on the edge. Once the JSL's contents have been used, the container can be employed as a practical storage bucket.

### **Decoration options**

The bucket can be printed and enhanced using all decoration processes: from the convenient offset method to brilliant In-Mould Labelling – through to sensory effects and watermarks for digital interaction with mobile terminals.

### **Ultra-lightweight**

As a bucket of the category UL, the JST consumes fewer resources and generates lower CO<sub>2</sub> emissions when transported, and also reduces disposal fees.

### **Broad edge for peel films**

The broad container edge permits it to be sealed using peel film.

### **Freshness seal with convenience factor**

The film protects your product and ensures trust on the part of the user. It is quick and simple to peel off completely without using a tool.

### **Stable and robust**

Thanks to its innovative design, the Jokey Seal Tainer is more robust and reliable to transport than comparable light containers.

### **Feather-light handle**

Thin and yet extremely strong - the tried and tested Jokey patent handle has a high vertical and horizontal load-bearing capacity. It can be coloured separately using the two-component process.
